

MIDAS # 1034

GREEN POND

NEW LIMERICK TWP, AROOSTOOK CO., MAINE

AREA 29 ACRES

TENTHS OF MILE

# GREEN POND

New Limerick, Aroostook Co.  
U.S.G.S. Linneus, Maine (7 1/2')

## Fishes

Landlocked salmon  
Brown trout  
Brook trout  
White perch  
Yellow perch  
Chain pickerel

Minnows  
Common shiner  
Blacknose shiner  
Blacknose dace  
Pearl dace  
White sucker  
American eel

## Physical Characteristics

Area - 29 acres  
Average depth - 12 feet  
Maximum depth - 31 feet

Temperatures:  
Surface - 68<sup>0</sup>F  
25 feet - 48<sup>0</sup>F

Principal fisheries: Brook trout, brown trout, white perch, chain pickerel

Green Pond provides good habitat for chain pickerel and seasonally good habitat for brook and brown trout. An oxygen deficiency below 15 feet occurs during summer months that eliminates most potential trout habitat. Trout likely utilize Green Pond during cooler months in spring, fall, and winter by movement within the Meduxnekeag River that flows through the eastern end of the pond.

Green Pond can be accessed only by permission from local landowners.
